

GOOD LOOKING AND READY FOR ACTION

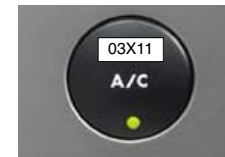

DESIGNED FOR YOU

The height-adjustable steering wheel of the Berlingo gives you complete control. So you can enjoy the incomparable driving comfort of variable power steering.

Easily accessible from both front seats, the RDS stereo radio/cassette can be operated by the steering wheel mounted controls. Electric windows are standard on Hi-Spec models.

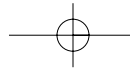

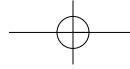

Enjoy the perfect temperature, even in the height of summer, thanks to the optional air conditioning. The control is housed on the central fascia.

As soon as you set your eyes on it, the Citroën Berlingo asserts its personality. With its solid bonnet, headlights and distinctive, robust radiator grille, you can see what you're getting straight away. And you're getting a vehicle with character. A vehicle ready to take you on any road, anywhere.

Inside, the dashboard has been comprehensively redesigned. It forms a wide horizontal panel, stretching out between the driver's and passenger's seat, either side of the console containing the comfort controls. Go on. Get in. The Citroën Berlingo is just waiting to show you what it can do!

The central console has been radically redesigned and sits between the seats. It has a large open storage area to carry small items, three small bottle holders and a portable ashtray.

REAL KNOW-HOW . . . AND MUCH MORE

03X25

The Citroën Berlingo ... it combines a degree of robustness and space that you can appreciate more than ever before, whatever your line of business. Its high standards of quality and comfort have been designed so that even everyday local journeys are a relaxing

experience. Your back will be well supported by a backrest as comfortable as it is resistant to intensive usage. Driving is also a smooth operation, thanks to a driving position ergonomically designed to avoid any non-essential movement.

05X34

As well as a rear interior light, there's also one in the front that illuminates the whole of the passenger area. It is easily accessible being located just in front of the rear view mirror.

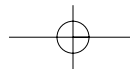

À L'ENVERS
02X50

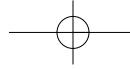

Sequential controls from the driver's side operate the tinted electric windows at the touch of a button (Hi-Spec models only).

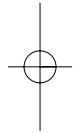

97X42

We've made sure that there's plenty of room on the side panels of the Berlingo for your company logo.

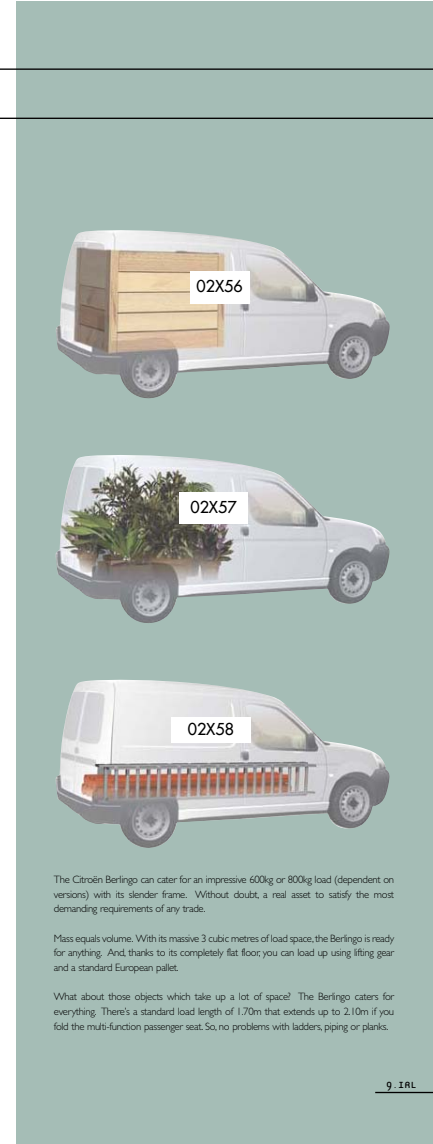

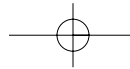

ACCESSIBILITY FOR ALL

Time to open up the Citroën Berlingo! The two rear doors open effortlessly. First to 90°, then to 180° if you need it.

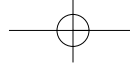

The most unwieldy, heavy and awkward objects can be put in this loading space by just sliding them in on the flat surface.

The Citroën Berlingo can cater for an impressive 600kg or 800kg load (dependent on version) with its slender frame. Without doubt, a real asset to satisfy the most demanding requirements of any trade.

Mass equals volume. With its massive 3 cubic metres of load space, the Berlingo is ready for anything. And, thanks to its completely flat floor, you can load up using lifting gear and a standard European pallet.

What about those objects which take up a lot of space? The Berlingo caters for everything. There's a standard load length of 1.70m that extends up to 2.10m if you fold the multi-function passenger seat. So no problems with ladders, piping or planks.

MADE-TO-MEASURE PERFECTION

Available with a choice of 600 or 800kg payload ratings the Berlingo truly excels when it comes to carrying loads. First there's the very useful 3m³ volume. Then, thanks to the wide door and the optional sliding side doors, there's the easy access to the expansive inner space. But the New Look Berlingo offers further clever ways of increasing its load

capacity. With the minimum of effort, the front seat folds to release extra length of approximately 40 centimeters. Designed for maximum versatility. When it looks like the space has run out, there's still more to be had. Not only can the Berlingo adapt easily to become the ideal working vehicle, it's well equipped to be the ideal working environment.

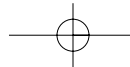

The standard ladder frame bulkhead behind the driver's seat, protects the driver from the movement of heavy loads in the event of sharp deceleration.

A detachable metal half-height bulkhead is available as an option. In addition when carrying a variety of small items, a protective grill (available as an accessory) means you can separate the driver's area from the load space.

The optional rear opening roof flap can be unlocked in an instant and, thanks to the removable aluminum protection bar, even the longest items are secure.

The multi-functional passenger seat with its adjustable headrest is perfectly comfortable. It's remarkably able to adapt to each and every one of your commercial needs.

With just one movement of the dual control lever, from either the driver's side or the passenger side, the back of the passenger seat transforms into a horizontal worktable complete with strap for documents and holders for cups and pens.

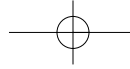

Another movement of the dual control lever makes the front seat and headrest swing up to 90°. In its open position it releases a load space of 2.10 m between the rear door and the space otherwise occupied by a passenger.

STRETCH YOUR CAPACITY TO DO BUSINESS

HANDY IN SO MANY WAYS

A REAL SENSE OF PRACTICALITY

A generously sized compartment located just above the windscreen provides even more storage.

Easily accessible without bending forward, the door pockets are able to store plans, maps, or even a one and a half litre bottle.

Step inside the Citroën Berlingo and there's a wealth of clever, practical ideas that really come into their own with usage. All models are equipped with double rear doors with glass panels and wash/wipe, while a tailgate version is also available as an option. Whichever version you choose, there's masses of storage space, lots of well thought out touches together with a whole host of unobtrusive yet useful details. All to simplify some of the daily elements of working life.

Tipped up, the multi-function passenger seat reveals a storage area with a volume of 100 litres. Indispensable when you want to keep valuables out of sight.

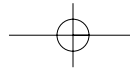

Just a flick of a switch. The lever of the left rear door is unlocked and opens it right up.

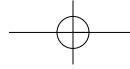

A thick non-fixed rubber mat protects the floor against wear and tear. And because it's slightly raised at the edges any split liquid can be more easily handed.

The load tie-down points are mounted beyond the edge of the floor matting. So they don't get in the way when you're loading up.

Release the catch and the rear doors open up to 180° in one movement. Even during loading!

READY FOR THE UNEXPECTED

There's a place for everything, even the unpredictable. The Citroën Berlingo is not content with offering you all the space and storage you need to do your job. It also guarantees you optimum peace of mind, whether you're out

and about in towns or on the open road and whatever the weather. Braking assistance systems such as ABS with EBD (Electronic Brakeforce Distribution) and large penetrating headlights all play a vital role.

05X69

Berlingo Hi-Spec models are equipped with a driver's airbag as standard, while passenger and lateral airbags are available as an option.

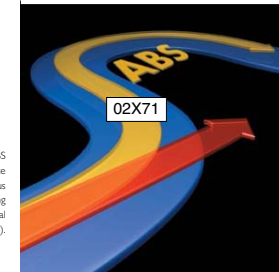

02X228

The integrated indicator lights and the perfectly smooth protective surface give a stronger line to the parabolic headlights thereby guaranteeing optimal vision in all scenarios. They can also be adjusted from the interior so that the beam is adapted according to the load on board.

DÉTAIL 03X7

The active safety system, of ABS and the Electronic Brake Force Distribution, ensure instantaneous application of the entire braking power in an emergency (optional on certain models).

02X71

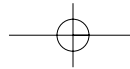

02E146

02X70

The high-frequency remote controlled locking means the driver can lock and unlock the vehicle remotely.

The front seat belts have pyrotechnic pretensioners and a limiting device for optimal response in the event of impact.

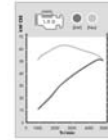

A CHOICE OF POWER OPTIONS

Whatever your needs, there's an engine type to suit your purpose with the New Look Berlingo. The 90 horsepower 2.0 HDi (high-pressure direct injection) displays an impressive 'tour de force'. It delivers particularly generous torque from the lowest of speeds, whilst remaining economical, quiet and clean.

Thanks to the Common Rail system, the engine is electronically controlled according to speed and the correct mixture of fuel is consequently fed to the injectors. As a result, the HDi engine's smoothness is exceptional, its cleanliness remarkable and it is one of the most economical in its class.

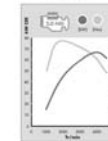

BERLINGO 1.9D

The naturally aspirated 1.9D engine in the Berlingo offers 71bhp for strong power and torque combined with low running costs. The Berlingo 1.9D is available in 600 and 800 formats as well as two specifications levels.

BERLINGO 2.0HDI

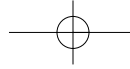

The advanced 2.0HDI engine is the latest in common rail direct injection diesel technology. The 2.0HDI is one of the most advanced engines in the class offering 90bhp for effortless power and high levels of torque, all combined with reduced environmental impact and fuel consumption.

PEACE OF MIND

DEALER NETWORK

Across Ireland, a network of Main Citroën Dealers and Service Dealers are equipped and trained to meet the needs of today's motorists, each with a team of technicians skilled in the care and maintenance of Citroën cars and vans and using only genuine Citroën parts.

COMPREHENSIVE WARRANTY

Every new Citroën vehicle has the benefit of 2 years manufacturers' warranty plus a 6 years anti-corrosion warranty and a two years paint warranty.

CITROËN ASSIST

Whilst Citroën vehicles are engineered for maximum reliability, there is always the possibility of something going wrong due to circumstances beyond your control. In response to a free telephone call, Citroën Assist designed by Gallic Distributors Ltd, brings rapid expert roadside assistance to you in an emergency. It comes free of charge for two years and operates 24 hours a day in all parts of Ireland. Citroën Assist also offers a comprehensive European service. Full details are available from your Citroën Dealer.

CITROËN ACCESSORIES

No matter which model of vehicle you have chosen, Citroën offers you a wide selection of accessories that have been specially designed to complement the style of your vehicle. The accessories available will allow you to add the personal touch to your vehicle. Genuine Citroën accessories are custom made for your vehicle and are available through your nearest Citroën Dealer.
